

## Almost there...

We were hoping to release the Beta version for our top patrons mid-month, but due to some health issues, we fell behind; however, we are kicking up gears in order to release it before the end of the month, so be a little more patient with us...

Once our beta player tests the game and finds any possible bug, we will make the final release. That should be in just a couple of days.

Meanwhile here is a little teaser of a scene from the upcoming release. Now, what could she be up to?
