- Added the forest with 4 locations
- Added the mall with 5 locations

Since some major changes were made to the core programming, all the previous saves won't work anymore, so you'll have to start over since the variables changed, but all of your gallery progress will remain unaffected.

We want to thank everyone for your constant support during this past hard month. Because of all of you, we didn't stop working and continued pushing forward even in tough times.

We also thank everyone who downloaded and played the game. Your feedback was amazing and allowed us to make some changes to the game and the story.

For all of our Sophie Patreons and up, remember there is a walkthrough available for you at our site, but we sincerely hope it's no longer required since we really made it abundantly clear what you have to do to follow the story.

We have already started to work on the next version, hoping not to take too long before bringing some news. And now, without further adieu, here is the game: <https://www.thehighschooldays.com/downloads/>
